|--|------------------|
| <i>Preface</i> | <i>page</i> xiii |
| <i>Acknowledgements</i> | xvi |
| 1 Bohr and Einstein: Einstein and Bohr | 1 |
| Albert Einstein and relativity | 1 |
| Relativity and quantum theory | 3 |
| Albert Einstein: universal genius | 6 |
| Niels Bohr and quantum theory | 7 |
| The debate continues | 10 |
| 2 The peace before the quantum | 12 |
| Classical physics | 12 |
| Newton's inheritance | 15 |
| 'Let Newton be' | 18 |
| Gravity on earth | 20 |
| More about motion | 21 |
| Planetary motions and gravity | 23 |
| The Newtonian Universe | 27 |
| A sketch of classical mechanics | 29 |
| The behaviour of waves | 36 |
| A sketch of electricity and magnetism | 43 |
| Light, from Newton to Maxwell | 48 |
| Heat and thermodynamics | 53 |
| Kinetic theory | 55 |
| Statistical mechanics | 59 |
| The chemical atom | 63 |
| Dividing the 'indivisible' | 66 |
| Conclusion | 72 |

| | | |
|---|--|-----|
| 3 | A glance at relativity | 73 |
| | The idea of relativity | 73 |
| | Michelson and Morley; Fitzgerald and Lorentz | 78 |
| | Relativity: the special theory | 82 |
| | Relativity in mechanics | 85 |
| | The background of general relativity | 87 |
| | Einstein, relativity and quantum theory | 89 |
| 4 | The slow rise of the quantum | 90 |
| | Planck and the genesis of the quantum | 90 |
| | Einstein and black body radiation | 98 |
| | Einstein and thermal capacities | 101 |
| | Bragg and X-rays | 104 |
| | Quantum theory – the first 13 years | 105 |
| | The basis of atomic spectroscopy | 107 |
| | The Bohr atom | 110 |
| | The heyday of the old quantum theory | 116 |
| | Einstein: spontaneous and stimulated emission | 120 |
| | The correspondence principle | 121 |
| | The Compton effect | 123 |
| | De Broglie, Bose and Einstein | 125 |
| | Spin, the exclusion principle and the Periodic Table | 129 |
| | Heisenberg and matrix mechanics | 134 |
| | Schrödinger and his equation | 138 |
| | Heisenberg and Schrödinger: the debate | 143 |
| | Uncertainty and indeterminacy | 147 |
| | Symmetry and statistics | 153 |
| | The scope of the quantum | 155 |
| | Back to Bohr and Einstein | 158 |
| 5 | Bohr: what does it all mean? | 159 |
| | Wonderful news from Copenhagen | 159 |
| | Bohr and hidden variables | 160 |
| | Bohr's ideas – static or evolving? | 162 |
| | The problem – as perceived by Bohr | 163 |
| | Popular views of Bohr's approach | 165 |
| | Complementarity – the quantum postulate | 169 |
| | The 'disturbance' trap | 172 |
| | Complementarity – the cut | 173 |

| | |
|---|-----|
| Complementarity – the use of classical concepts | 175 |
| Complementarity – the heart of the argument | 176 |
| Wholeness | 178 |
| Complementarity – the problems | 181 |
| Some comments on Bohr and complementarity | 184 |
| Complementarity in other fields | 189 |
| Von Neumann and the Princeton interpretation | 193 |
| Wave-function collapse | 195 |
| Von Neumann’s impossibility proof | 199 |
| Wigner and consciousness | 200 |
| | |
| 6 Einstein’s negative views | 202 |
| The 1927 Solvay congress | 202 |
| The Bohr–Einstein debate: round one | 205 |
| Einstein and ensembles | 210 |
| The difficulties with ensembles | 213 |
| The Bohr–Einstein debate: round two | 217 |
| Determinism, realism, locality | 219 |
| Completeness | 223 |
| The Bohr–Einstein debate: round three; EPR | 224 |
| Bohr on EPR | 228 |
| Schrödinger’s cat and Wigner’s friend | 234 |
| Einstein’s demands for a quantum theory | 236 |
| Einstein’s ideas for a quantum theory | 239 |
| | |
| 7 Bohm, Bell and experimental philosophy | 244 |
| David Bohm: life and times | 244 |
| De Broglie and pilot waves | 246 |
| Bohm theory – the minimalist approach | 246 |
| Bohm theory – the quantum potential | 248 |
| Responses to Bohm | 250 |
| Bell and the de Broglie–Bohm theory | 253 |
| Bell and the impossibility proofs | 255 |
| Bell and non-locality | 258 |
| Experimental philosophy | 260 |
| What do the experiments mean? | 263 |
| Bohm: the later years | 266 |
| Development of the de Broglie–Bohm theory | 267 |
| The realist point of view | 270 |

| | | |
|---|--|-----|
| 8 | A round-up of recent developments | 274 |
| | Everett and relative states | 274 |
| | De Witt and many worlds | 276 |
| | Discussion of the many worlds interpretation | 280 |
| | More about ensembles | 284 |
| | Ensembles and measurement | 286 |
| | Zurek and decoherence | 289 |
| | Consistent or decoherent histories | 292 |
| | The quantum state diffusion model | 297 |
| | Peierls and the knowledge interpretation | 301 |
| | Stochastic interpretations | 303 |
| | Models of spontaneous collapse | 305 |
| | The quantum Zeno effect | 308 |
| | The neutron interferometer | 314 |
| | Leggett and macroscopic quantum mechanics | 318 |
| 9 | Bohr or Einstein? | 323 |
| | References | 328 |
| | Additional bibliography | 337 |
| | Index | 339 |
