

# CONTENTS

<b>Preface</b>		v
<b>I. Canonical Operator Formalism of Quantum Mechanics</b>		<b>1</b>
1.1 Canonical Quantization		1
Classical Mechanics		1
Quantum Mechanics – Schrodinger Picture		2
1.2 Heisenberg Picture		3
1.3 Interaction Picture		4
1.4 Quantum Theory of Fields		5
<b>II. Path Integral Formalism</b>		<b>8</b>
2.1 Path Integral in Quantum Mechanics		8
Representation of Feynman Kernel in terms of Phase Space Path Integral		8
Feynman's Path Integral in Configuration ( $q$ -) Space		11
2.2 Path Integral in Quantum Field Theory		12
<b>III. Path Integral Formalism of Fermi Fields</b>		<b>14</b>
3.1 Grassmann Variables (anti-commuting $c$ number variables)		14
3.2 Coherent State Representation of Fermi Operators in Terms of Grassmann's Numbers		17
Review of Coherent State Representation of Bose Operators		17
Coherent State Representation of Fermi Operators		18
3.3 Holomorphic Path Integral Representation		19
3.4 Dirac Field		21

<b>IV. Perturbation Theory and Feynman Graphs</b>	<b>22</b>
4.1 Generating Functional	22
Definition	22
Calculation of $Z_0 [j]$	23
4.2 Feynman Propagator	26
4.3 Perturbation Expansion and Feynman Rules	27
4.4 Proper Graphs and Theory of Effective Action	33
Connected Diagrams, Proper Diagrams	33
Theory of Effective Action	36
<b>V. Euclidean Field Theory and Statistical Mechanics</b>	<b>38</b>
5.1 Statistical Mechanics, Euclidean Path Integral and Euclidean Field Theory	38
5.2 Perturbation Expansion	40
5.3 Application of BCS Theory of Superconductivity	42
Feynman Rules	42
Derivation of Landau-Ginzburg Equation	45
Higgs Mechanism	51
Abrikosov-Nielsen-Olesen Vortex Solution	55
<b>VI. Point Canonical Transformation</b>	<b>59</b>
6.1 Point Canonical Transformation in Operator Formalism	59
6.2 Weyl Ordering and Midpoint Prescription of Path Integral	61
Weyl Ordering	61
Midpoint Prescription and Weyl Ordering	62
$\Delta V$	65
6.3 Point Canonical Transformation in Path Integral	65
6.4 Perturbation Expansion in Phase Space Path Integral	68

<b>VII. Large N Collective Variables</b>	<b>74</b>
7.1 The Collective Field Theory of $N$ Bose Particles	74
High Density Bose Plasma	77
Collective Motions of $N$ -Identical Harmonic Oscillators	79
7.2 Planar Limit of $SU(N)$ Symmetric Hermitian Matrix Model	81
Planar Limit	81
Collective Field Theory	83
Calculation of $V_{coll}$	86
Large $N$ Limit	87
Collective Excitations	89
<b>VIII. Variational Method</b>	<b>91</b>
8.1 Feynman's Variational Method	91
8.2 Lee Low Pines Theory of Polaron	95
Polaron Problem	95
Change of Variables	96
Variational Method Applied to the Polaron Problem	99
Remarks	104
8.3 Ground State Energy of the $SU(N)$ Symmetric Hermitian Matrix Model	105
<b>IX. WKB Method I. Instantons</b>	<b>108</b>
9.1 Steepest Descent Method of Integration	108
9.2 Double Well Potential: an Example	109
9.3 Ground State Energy of Double Well Potential in Terms of the Standard WKB Calculation	124

<b>X.</b>	<b>WKB Method II. Solitons</b>	<b>129</b>
10.1	Non-linear Scalar Field Theory Model in 2 Dimensions and its	
	Classical Solutions	129
	Mechanical Analogue Model	130
	Classical Solutions	131
	Stability of the Classical Soliton Solution	136
10.2	Perturbation Theory and Renormalization	137
10.3	Solitons in Quantum Field Theory	140
	Soliton Solution	140
	Collective Coordinates	141
	Momentum Integration	143
	Expansion About Soliton Solution	145
	One Loop Quantum Corrections of Soliton Mass and	
	Renormalization	148
<b>AI.</b>	<b>Quantum Theory of Non-Abelian Gauge Fields</b>	<b>153</b>
A1.1	Classical Gauge Field Theory	153
	QED	153
	Yang-Mills Field Theory	154
A1.2	Quantum Theory of Yang-Mills Fields	156
	$A_0 = 0$ Gauge	156
	Canonical Formalism	156
	Symmetry	157
	Quantization	159
A1.3	Equivalence of $A_0 = 0$ Canonical Quantization and Covariant	
	Quantization	159
<b>AII.</b>	<b>Spin System and Lattice Gauge Theory</b>	<b>163</b>
A2.1	$O(N)$ Heisenberg Spin System	163
	$O(2)$	163
	$O(N)$	164
A2.2	$SU(N)$ Symmetric Hermitian Matrix Model	164

A2.3 SU(N) Matrix Model (Chiral Model)	165
A2.4 SU(N) Gauge Theory: Kogut-Susskind Model	167
A2.5 Strong Coupling Expansion	169
A2.6 Renormalization and the $\beta$ Function	170

<b>AIII. Stochastic Quantization</b>	<b>173</b>
--------------------------------------	------------

<b>Notes</b>	<b>211</b>
