Preface	v
<b>I. PHENOMENOLOGICAL THEORY OF SUPERCONDUCTIVITY</b>	
1. Experimental Facts	1
2. Gorter-Casimir Two-Fluid Model	3
3. Electrodynamics of Superconductors	5
4. Ginzburg-Landau Theory of Superconductivity	13
5. Josephson Tunnelling	23
6. Influence of the Fluctuations	25
7. Type-II Superconductors	29
<b>II. MICROSCOPIC THEORY OF SUPERCONDUCTIVITY</b>	
8. The Cooper Instability of the Fermi Gas	46
9. Self-Consistent Field Method — Gor'kov Equations	48
10. Linear Response to a Magnetic Field	57
11. Microscopic Derivation of the Ginzburg-Landau Equations	63
12. Quasiclassical Approximation	67
13. Strong-Coupling Theory of Superconductivity	79
14. Spin Fluctuations in Superconductors	95
15. Triplet Pairing	100
Appendix	106
