

# **CONTENTS**

<b>1.</b>	<b>INTRODUCTION .....</b>	<b>1</b>
1.1.	Background .....	1
1.2.	Scope .....	2
1.3.	Objective .....	3
<b>2.</b>	<b>SCENARIOS FOR THE ILLEGAL TRANSPORT OF RADIOACTIVE MATERIAL .....</b>	<b>3</b>
2.1.	Introduction .....	3
2.2.	Scenarios for the illicit trafficking of radioactive material in public mail .....	5
<b>3.</b>	<b>DISTRIBUTION PATHS OF PUBLIC MAIL AND POSSIBLE MONITORING LOCATIONS .....</b>	<b>7</b>
3.1.	International mail stream .....	7
3.2.	Mail monitoring strategy .....	8
3.2.1.	Introduction .....	8
3.2.2.	Comparing monitoring methods .....	10
3.2.3.	Monitoring of a vehicle or container .....	11
3.2.4.	Automatic monitoring of single mail items with RCMs .....	11
3.2.5.	Combination of vehicle and single mail monitoring .....	11
3.2.6.	Monitoring with PRDs .....	12
<b>4.</b>	<b>RADIATION MONITORING EQUIPMENT .....</b>	<b>12</b>
4.1.	Introduction .....	12
4.2.	Radiation portal monitors .....	13
4.2.1.	General .....	13
4.2.2.	Operation .....	13
4.2.3.	Calibration and routine checking .....	15
4.3.	Radiation conveyor belt monitors .....	15
4.3.1.	General .....	15
4.3.2.	Operation .....	15
4.3.3.	Calibration and routine checking .....	16
4.4.	Personal radiation detectors .....	17

4.4.1. General .....	17
4.4.2. Operation .....	17
4.4.3. Calibration and routine checking .....	18
4.5. Neutron search detectors .....	18
4.5.1. General .....	18
4.5.2. Operation .....	19
4.5.3. Calibration and routine checking .....	19
4.6. Multipurpose hand-held RIDs .....	19
4.6.1. General .....	19
4.6.2. Operation .....	20
4.6.3. Calibration and routine checking .....	20
5. RESPONSE PLAN .....	21
5.1. Detection and verification .....	21
5.2. Assessment and localization .....	21
5.3. Identification .....	22
5.4. Model for a response plan .....	23
6. IMPLEMENTATION OF PUBLIC MAIL RADIATION MONITORING .....	26
6.1. Establishing the legal basis .....	26
6.2. Defining the responsible authority .....	27
6.3. Contracting a project management team .....	27
6.4. Defining and implementing a mail radiation monitoring project .....	27
6.4.1. Design of a mail radiation monitoring strategy .....	28
6.4.2. Definition of national monitoring locations .....	28
6.4.3. Identification of appropriate equipment .....	28
6.4.4. Test phase of equipment .....	29
6.4.5. Installation of monitoring equipment .....	29
6.4.6. Development of the response plan .....	29
6.4.7. Training the local public postal operator .....	29
6.4.8. Support for the local public postal operator .....	29
7. TRAINING .....	30
REFERENCES .....	33

ANNEX I: PROCESS LEADING TO DETECTION OF RADIOACTIVE MATERIAL IN PUBLIC MAIL .....	35
ANNEX II: RADIOACTIVE MATERIAL IN PUBLIC MAIL: FOUR DIFFERENT SCENARIOS .....	36
