

CONTENTS

CHAPTER 1. CHLOROFLUOROCARBONS IN AQUATIC ENVIRONMENTS	1
<i>L.N. Plummer, E. Busenberg</i>	
1.1. Introduction	1
1.2. Terminology	4
1.3. Importance of the multi-tracer approach	6
1.4. How to use this guidebook	7
CHAPTER 2. CHLOROFLUOROCARBONS IN THE ATMOSPHERE	9
<i>L.N. Plummer, E. Busenberg</i>	
2.1. History of atmospheric CFC concentrations	9
2.2. Characteristics of the distribution of CFCs in the atmosphere	11
2.3. Time dependent CFC concentration ratios in the atmosphere	14
CHAPTER 3. PRINCIPLES OF CHLOROFLUOROCARBON DATING	17
<i>L.N. Plummer, E. Busenberg, P.G. Cook</i>	
3.1. Basic assumption	17
3.2. Dating with CFC concentrations	18
3.3. Dating with CFC concentration ratios	26
3.4. Setting the 'clock'	26
3.5. Groundwater age	28
3.6. Future applications of CFCs	29
CHAPTER 4. EFFECTS AND PROCESSES THAT CAN MODIFY APPARENT CFC AGE	31
<i>P.G. Cook, L.N. Plummer, D.K. Solomon, E. Busenberg, L.F. Han</i>	
4.1. Contamination	31
4.2. Unsaturated zone transport of CFCs	37
4.3. Recharge temperature	42
4.4. Excess air	47

4.5. Sorption	50
4.6. Microbial degradation	51
4.7. Matrix diffusion	53
4.8. Hydrodynamic dispersion	54
4.9. Summary	56
CHAPTER 5. CFCs IN BINARY MIXTURES OF YOUNG AND OLD GROUNDWATER	59
<i>L.N. Plummer, E. Busenberg, L.F. Han</i>	
5.1. Groundwater mixtures.....	59
5.2. Binary mixtures.....	60
5.3. General case of binary mixing.....	63
5.4. Tracer plots	65
5.5. Multi-tracer plots	68
5.6. Summary of binary mixing	71
CHAPTER 6. MODELS OF GROUNDWATER AGES AND RESIDENCE TIMES.....	73
<i>D.K. Solomon, P.G. Cook, L.N. Plummer</i>	
6.1. Introduction.....	73
6.2. Unconfined aquifer with constant thickness.....	75
6.3. Unconfined aquifer with linearly increasing thickness	79
6.4. Confined aquifer with constant thickness	81
6.5. Confined aquifer with constant thickness in confined part....	83
6.6. Discussion	85
6.7. Summary	88
CHAPTER 7. PRACTICAL APPLICATIONS OF CFCs IN HYDROLOGICAL INVESTIGATIONS.....	89
<i>D.K. Solomon, L.N. Plummer, E. Busenberg, P.G. Cook</i>	
7.1. Estimation of recharge rate from rate of downward movement using vertical CFC profiles	89
7.2. Application of a discharge model.....	91
7.3. Tracing flow direction and velocity using spatial variations — losing and gaining streams.....	92
7.4. Identifying recharge areas.....	95
7.5. Identifying 'secure' drinking water sources — recognizing leakage of shallow water into water supply wells.....	97

7.6. Reconstructing the history of contaminant loading to an aquifer	99
7.7. Calibrating groundwater flow models	101

CHAPTER 8. DATA INTERPRETATION IN REPRESENTATIVE CASES...... 105
L.N. Plummer, E. Busenberg, L.F. Han

8.1. Introduction.....	105
8.2. Shallow, aerobic infiltration water (sample 1)	106
8.3. Dated waters from springs, Shenandoah National Park and vicinity, Virginia, USA (samples 2 and 3)	106
8.4. Mixtures from fractured rock and karstic aquifers (samples 4–7).....	119
8.5. Water contaminated with one or more CFCs (samples 8–16).....	120
8.6. Microbial degradation of CFCs (samples 17–19).....	124
8.7. Groundwater beneath deep unsaturated zones (samples 20–22).....	125
8.8. Gas stripping and microbial degradation (samples 23 and 24)	127
8.9. Screening patterns of CFC apparent ages for an initial assessment	128
8.10. Guidelines for assignment of apparent CFC age	130

CHAPTER 9. SELECTED CASE STUDIES USING CFC DATA.... 135
L.N. Plummer, E. Busenberg, P.G. Cook, H. Oster, L.F. Han, M. Gröning

9.1. Delmarva, USA	135
9.2. Sturgeon Falls, Ontario, Canada	140
9.3. Valdosta, Georgia, USA	143
9.4. Shenandoah National Park, USA.....	147
9.5. Eastern Snake River Plain Aquifer, Idaho, USA.....	150
9.6. Idaho National Engineering and Environmental Laboratory, Idaho, USA	152
9.7. Tracing and dating leakage from the Danube River, Hungary	157
9.8. Valley and Ridge siliciclastics, Pennsylvania, USA	159
9.9. Susceptibility of public water supplies to shallow contamination, Virginia, USA	161

9.10. Examples of CFCs in surface waters, USA	165
9.11. Fractured Rock Aquifers, Clare Valley, South Australia.	168
9.12. Remediation timescale for nitrate polluted groundwater at Grossrinderfeld, Germany	170
9.13. Tracing of contaminated shallow groundwater in a deep aquifer system, Germany	174
9.14. Equatorial Low Tritium Activity Region in Mindanao, Philippines.	178
CHAPTER 10. POTENTIAL USE OF OTHER ATMOSPHERIC GASES	183
<i>E. Busenberg, L.N. Plummer</i>	
10.1. Sulphur hexafluoride (SF ₆)	183
10.2. Trifluoromethyl sulphur pentafluoride (CF ₃ SF ₅)	188
10.3. HCFC-22 (CHF ₂ Cl)	188
10.4. Perfluorocarbons	189
10.5. Trifluoroacetate or TFA (CF ₃ COO ⁻).	189
CHAPTER 11. COMPARISON OF THE CFC TECHNIQUE WITH OTHER TECHNIQUES (³H, ³H/³He, ⁸⁵Kr).	191
<i>L.F. Han, M. Gröning, L.N. Plummer, D.K. Solomon</i>	
11.1. Introduction.	191
11.2. ³ H technique	192
11.3. ³ H/ ³ He technique	195
11.4. ⁸⁵ Kr technique	196
11.5. Summary	197
CHAPTER 12. SAMPLING AND ANALYTICAL METHODS	199
<i>E. Busenberg, L.N. Plummer, P.G. Cook, D.K. Solomon, L.F. Han, M. Gröning, H. Oster</i>	
12.1. General requirements	199
12.2. Collecting groundwater	200
12.3. Sampling CFCs in glass ampoules	203
12.4. Sampling in glass bottles	205
12.5. Sampling using copper tubes.	208
12.6. Analysis of CFCs in water at the U.S. Geological Survey Chlorofluorocarbon Laboratory.	210
12.7. Preservation of samples.	217

APPENDIX I. PHYSICAL AND CHEMICAL PROPERTIES OF CFCs.....	221
APPENDIX II. INPUT FUNCTIONS	222
APPENDIX III. DATA EVALUATION SOFTWARE.....	228
APPENDIX IV. REPRESENTATIVE LIST OF CFC LABORATORIES	247
ABBREVIATIONS	251
REFERENCES.....	253
CONTRIBUTORS TO DRAFTING AND REVIEW.....	277
