

# Contents

<b>1. The Discovery of the Weak Interaction . . . . .</b>	<b>1</b>
1.1 The Universal Fermi Interaction . . . . .	2
1.2 The Non-conservation of Parity . . . . .	10
1.3 Bibliographical Notes . . . . .	22
<b>2. Leptonic Interactions . . . . .</b>	<b>25</b>
2.1 The Current–Current Interaction (Charged Currents) . . . . .	25
2.2 The Decay of the Muon . . . . .	27
2.3 The Lifetime of the Muon . . . . .	38
2.4 Parity Violation in the Muon Decay . . . . .	44
2.5 The Michel Parameters . . . . .	53
2.6 The Tau Lepton . . . . .	71
2.7 Bibliographical Notes . . . . .	76
<b>3. Limitations of Fermi Theory . . . . .</b>	<b>79</b>
3.1 Neutral Currents . . . . .	79
3.2 Scattering of a Muon Neutrino by an Electron . . . . .	80
3.3 $\bar{\nu}_\mu - e^-$ Scattering . . . . .	83
3.4 High-Energy Behaviour of Neutrino–Electron Scattering . . . . .	86
3.5 Supplement: Scattering Formalism for Spin- $\frac{1}{2}$ Particles . . . . .	95
3.6 Divergences in Higher-Order Processes . . . . .	102
3.7 Bibliographical Notes . . . . .	104
<b>4. The Salam–Weinberg Theory . . . . .</b>	<b>107</b>
4.1 The Higgs Mechanism . . . . .	107
4.2 The Yang–Mills Field . . . . .	119
4.3 The Feynman Rules of Yang–Mills Theory . . . . .	129
4.4 The Glashow–Salam–Weinberg Model of Leptons . . . . .	146
4.5 Spontaneous Symmetry Breaking: The Higgs Sector . . . . .	154
4.6 Hidden $SU(2) \times U(1)$ Gauge Invariance . . . . .	168
4.7 Bibliographical Notes . . . . .	175
<b>5. Some Properties of the Salam–Weinberg Theory of Leptons . . . . .</b>	<b>177</b>
5.1 Decay of the Charged Boson $W^-$ . . . . .	177
5.2 The Process $e^+e^- \rightarrow Z^0 \rightarrow \mu^+\mu^-$ . . . . .	182

5.3	High-Energy Behaviour of the GSW Theory . . . . .	197
5.4	Bibliographical Notes . . . . .	203
<b>6.</b>	<b>Semi-Leptonic Interactions of Hadrons . . . . .</b>	<b>205</b>
6.1	The World of Hadrons . . . . .	205
6.2	Phenomenology of Decays of Hadrons . . . . .	208
6.3	Weak Interactions of Quarks . . . . .	216
6.4	Cabibbo's Theory of Flavour Mixing . . . . .	227
6.5	Bibliographical Notes . . . . .	246
<b>7.</b>	<b>Nuclear Beta Decay . . . . .</b>	<b>247</b>
7.1	The MIT Bag Model . . . . .	247
7.2	Beta Decay of the Neutron . . . . .	253
7.3	Nuclear Beta Decay . . . . .	260
7.4	Properties of Allowed Beta Decays . . . . .	263
7.5	Bibliographical Notes . . . . .	285
<b>8.</b>	<b>The Neutral Kaon System . . . . .</b>	<b>287</b>
8.1	The Particles $K_S$ and $K_L$ . . . . .	287
8.2	CP Violation . . . . .	296
<b>9.</b>	<b>Unified Gauge Theories . . . . .</b>	<b>303</b>
9.1	Introduction: The Symmetry Group SU(5) . . . . .	303
9.2	Embedding $SU(3)_C \times SU(2)_L \times U(1)$ into SU(5) . . . . .	309
9.3	The SU(5) Gauge Theory . . . . .	326
9.4	Spontaneous Breaking of the SU(5) Symmetry . . . . .	341
9.5	Determination of the Scale of SU(5) Symmetry Breaking . . . . .	351
9.6	Proton Decay . . . . .	365
9.7	Outlook: Extensions of the Standard Model . . . . .	381
9.8	Bibliographical Notes . . . . .	385
<b>Appendix</b>	. . . . .	<b>387</b>
A.	Conventions and "Natural" Units . . . . .	387
B.	The Dirac Equation . . . . .	388
C.	Feynman Rules . . . . .	391
D.	Symmetry Transformations . . . . .	393
<b>Subject Index</b>	. . . . .	<b>397</b>
