CONTENTS

Preface vii

Introduction 1

Elementary Particle Physics 1
How Do You *Produce* Elementary Particles? 4
How Do You *Detect* Elementary Particles? 7
Units 8
References and Notes 10

1 Historical Introduction to the Elementary Particles 11

1.1 The Classical Era (1897–1932) 11
1.2 The Photon (1900–1924) 14
1.3 Mesons (1934–1947) 17
1.4 Antiparticles (1930–1956) 18
1.5 Neutrinos (1930–1962) 22
1.6 Strange Particles (1947–1960) 28
1.7 The Eightfold Way (1961–1964) 33
1.8 The Quark Model (1964) 37
1.9 The November Revolution and Its Aftermath (1974–1983) 41
1.10 Intermediate Vector Bosons (1983) 44
1.11 The Standard Model (1978–?) 46
References and Notes 49
Problems 51

2 Elementary Particle Dynamics 55

2.1 The Four Forces 55
2.2 Quantum Electrodynamics (QED) 56
2.3 Quantum Chromodynamics (QCD) 60
2.4 Weak Interactions 65
2.5 Decays and Conservation Laws 72
2.6 Unification Schemes 76
References and Notes 78
Problems 78

3 Relativistic Kinematics 81

3.1 Lorentz Transformations 81
3.2 Four-Vectors 84
3.3 Energy and Momentum 87
3.4 Collisions 91
3.5 Examples and Applications 93
References and Notes 99
Problems 99

4 Symmetries 103

4.1 Symmetries, Groups, and Conservation Laws 103
4.2 Spin and Orbital Angular Momentum 107
4.3 Addition of Angular Momenta 109
4.4 Spin $\frac{1}{2}$ 113
4.5 Flavor Symmetries 116
4.6 Parity 122
4.7 Charge Conjugation 128
4.8 *CP* Violation 130
4.9 Time Reversal and the *TCP* Theorem 134
References and Notes 135
Problems 137

5 Bound States 143

5.1 The Schrödinger Equation for a Central Potential 143
5.2 The Hydrogen Atom 148
5.3 Fine Structure 151
5.4 The Lamb Shift 154
5.5 Hyperfine Structure 156
5.6 Positronium 159
5.7 Quarkonium 164
5.8 Light Quark Mesons 168
5.9 Baryons 172
5.10 Baryon Masses and Magnetic Moments 180
References and Notes 184
Problems 186

6 The Feynman Calculus 189

6.1 Lifetimes and Cross Sections 189
6.2 The Golden Rule 194
6.3 The Feynman Rules for a Toy Theory 201
6.4 Lifetime of the *A* 204
6.5 Scattering 204

6.6 Higher-Order Diagrams 206
References and Notes 210
Problems 211

7 Quantum Electrodynamics 213

7.1 The Dirac Equation 213
7.2 Solutions to the Dirac Equation 216
7.3 Bilinear Covariants 222
7.4 The Photon 225
7.5 The Feynman Rules for Quantum Electrodynamics 228
7.6 Examples 231
7.7 Casimir's Trick and the Trace Theorems 236
7.8 Cross Sections and Lifetimes 240
7.9 Renormalization 246
References and Notes 250
Problems 251

8 Electrodynamics of Quarks and Hadrons 257

8.1 Electron-Quark Interactions 257
8.2 Hadron Production in e^+e^- Scattering 258
8.3 Elastic Electron-Proton Scattering 262
8.4 Inelastic Electron-Proton Scattering 266
8.5 The Parton Model and Bjorken Scaling 269
8.6 Quark Distribution Functions 273
References and Notes 277
Problems 277

9 Quantum Chromodynamics 279

9.1 Feynman Rules for Chromodynamics 279
9.2 The Quark-Quark Interaction 284
9.3 Pair Annihilation in QCD 289
9.4 Asymptotic Freedom 292
9.5 Applications of QCD 295
References and Notes 296
Problems 296

10 Weak Interactions 301

10.1 Charged Leptonic Weak Interactions 301
10.2 Decay of the Muon 304
10.3 Decay of the Neutron 309
10.4 Decay of the Pion 314

10.5 Charged Weak Interactions of Quarks 317
10.6 Neutral Weak Interactions 322
10.7 Electroweak Unification 330
References and Notes 338
Problems 339

11 Gauge Theories 343

11.1 Lagrangian Formulation of Classical Particle Mechanics 343
11.2 Lagrangians in Relativistic Field Theory 344
11.3 Local Gauge Invariance 348
11.4 Yang–Mills Theory 350
11.5 Chromodynamics 355
11.6 Feynman Rules 357
11.7 The Mass Term 360
11.8 Spontaneous Symmetry-Breaking 362
11.9 The Higgs Mechanism 365
References and Notes 368
Problems 368

APPENDIX A. The Dirac Delta Function 372

APPENDIX B. Decay Rates and Cross Sections 376

APPENDIX C. Pauli and Dirac Matrices 378

APPENDIX D. Feynman Rules 380

Index 384
