A Tour of Mathematica	1
■ <i>Mathematica</i> as a Calculator ■ Power Computing with <i>Mathematica</i> ■ Accessing Algorithms in <i>Mathematica</i> ■ Mathematical Knowledge in <i>Mathematica</i> ■ Building Up Computations ■ Handling Data ■ Visualization with <i>Mathematica</i> ■ <i>Mathematica</i> Notebooks ■ Palettes and Buttons ■ Mathematical Notation ■ <i>Mathematica</i> and Your Computing Environment	
■ The Unifying Idea of <i>Mathematica</i> ■ <i>Mathematica</i> as a Programming Language ■ Writing Programs in <i>Mathematica</i>	
■ Building Systems with <i>Mathematica</i> ■ <i>Mathematica</i> as a Software Component ■ The World of <i>Mathematica</i>	

Part 1. A Practical Introduction to *Mathematica*

1.0 Running <i>Mathematica</i>	26
■ Notebook Interfaces ■ Text-Based Interfaces	
1.1 Numerical Calculations	29
■ Arithmetic ■ Exact and Approximate Results ■ Some Mathematical Functions ■ Arbitrary-Precision Calculations	
-■ Complex Numbers ■ Getting Used to <i>Mathematica</i> -■ Mathematical Notation in Notebooks	
1.2 Building Up Calculations	38
■ Using Previous Results ■ Defining Variables ■ Making Lists of Objects ■ Manipulating Elements of Lists ■ The Four Kinds of Bracketing in <i>Mathematica</i> ■ Sequences of Operations	
1.3 Using the <i>Mathematica</i> System	44
-■ The Structure of <i>Mathematica</i> -■ Differences between Computer Systems ■ Special Topic: Using a Text-Based Interface	
+■ Doing Computations in Notebooks -■ Notebooks as Documents +■ Active Elements in Notebooks +■ Special Topic: Hyperlinks and Active Text +■ Getting Help in the Notebook Front End ■ Getting Help with a Text-Based Interface	
■ <i>Mathematica</i> Packages ■ Warnings and Messages ■ Interrupting Calculations	
1.4 Algebraic Calculations	62
■ Symbolic Computation ■ Values for Symbols ■ Transforming Algebraic Expressions -■ Simplifying Algebraic Expressions -■ Advanced Topic: Putting Expressions into Different Forms +■ Advanced Topic: Simplifying with Assumptions	
-■ Picking Out Pieces of Algebraic Expressions ■ Controlling the Display of Large Expressions ■ The Limits of <i>Mathematica</i> ■ Using Symbols to Tag Objects	
1.5 Symbolic Mathematics	78
■ Basic Operations ■ Differentiation -■ Integration -■ Sums and Products ■ Equations ■ Relational and Logical Operators	
■ Solving Equations ■ Differential Equations ■ Power Series ■ Limits +■ Integral Transforms -■ Packages for Symbolic Mathematics -■ Advanced Topic: Generic and Non-Generic Cases +■ Mathematical Notation in Notebooks	

1.6 Numerical Mathematics	100
■ Basic Operations ■ Numerical Sums, Products and Integrals ■ Numerical Equation Solving ■ Numerical Differential Equations ■ Numerical Optimization ■ Manipulating Numerical Data ~■ Statistics Packages	
1.7 Functions and Programs	108
■ Defining Functions ■ Functions as Procedures ■ Repetitive Operations ■ Transformation Rules for Functions	
1.8 Lists	113
■ Collecting Objects Together ■ Making Tables of Values ~■ Vectors and Matrices ~■ Getting Pieces of Lists ■ Testing and Searching List Elements ~■ Adding, Removing and Modifying List Elements ■ Combining Lists ■ Advanced Topic: Lists as Sets ■ Rearranging Lists ~■ Grouping Together Elements of Lists +■ Advanced Topic: Alignment and Padding in the Partitioning of Lists ■ Mathematical Operations on Lists ~■ Advanced Topic: Rearranging Nested Lists ~■ Advanced Topic: Combinatorial Operations	
1.9 Graphics and Sound	133
■ Basic Plotting ■ Special Topic: How Graphics Are Output ■ Options ■ Redrawing and Combining Plots ■ Advanced Topic: Manipulating Options ■ Contour and Density Plots ■ Three-Dimensional Surface Plots ■ Converting between Types of Graphics ■ Plotting Lists of Data ■ Parametric Plots ■ Some Special Plots ■ Special Topic: Animated Graphics ■ Sound	
1.10 Input and Output in Notebooks	178
+■ Entering Greek Letters +■ Entering Two-Dimensional Input +■ Editing and Evaluating Two-Dimensional Expressions ~■ Entering Formulas +■ Entering Tables and Matrices +■ Subscripts, Bars and Other Modifiers +■ Special Topic: Non-English Characters and Keyboards +■ Other Mathematical Notation +■ Forms of Input and Output ~■ Mixing Text and Formulas +■ Displaying and Printing <i>Mathematica</i> Notebooks +■ Creating Your Own Palettes +■ Setting Up Hyperlinks +■ Automatic Numbering +■ Exposition in <i>Mathematica</i> Notebooks	
1.11 Files and External Operations	208
■ Reading and Writing <i>Mathematica</i> Files ■ Advanced Topic: Finding and Manipulating Files +■ Importing and Exporting Data ~■ Exporting Graphics and Sounds ~■ Exporting Formulas from Notebooks ~■ Generating TeX +■ Converting Notebooks to HTML ■ Generating C and Fortran Expressions ■ Splicing <i>Mathematica</i> Output into External Files ■ Running External Programs ■ <i>MathLink</i>	
1.12 Special Topic: The Internals of <i>Mathematica</i>	220
+■ Why You Do Not Usually Need to Know about Internals +■ Basic Internal Architecture +■ The Algorithms of <i>Mathematica</i> +■ The Software Engineering of <i>Mathematica</i> +■ Testing and Verification	

Part 2. Principles of *Mathematica*

2.1 Expressions	232
■ Everything Is an Expression ■ The Meaning of Expressions ■ Special Ways to Input Expressions ■ Parts of Expressions ■ Manipulating Expressions like Lists ■ Expressions as Trees ■ Levels in Expressions	
2.2 Functional Operations	242
■ Function Names as Expressions ~■ Applying Functions Repeatedly ~■ Applying Functions to Lists and Other Expressions ■ Applying Functions to Parts of Expressions ■ Pure Functions ■ Building Lists from Functions ■ Selecting Parts of Expressions with Functions ■ Expressions with Heads That Are Not Symbols ■ Advanced Topic: Working with Operators ~■ Structural Operations +■ Sequences	

2.3	Patterns.....	261
	■ Introduction ~■ Finding Expressions That Match a Pattern ■ Naming Pieces of Patterns ■ Specifying Types of Expression in Patterns ■ Putting Constraints on Patterns ■ Patterns Involving Alternatives ■ Flat and Orderless Functions ■ Functions with Variable Numbers of Arguments ■ Optional and Default Arguments ■ Setting Up Functions with Optional Arguments ■ Repeated Patterns +■ Verbatim Patterns ■ Patterns for Some Common Types of Expression ■ An Example: Defining Your Own Integration Function	
2.4	Transformation Rules and Definitions.....	285
	~■ Applying Transformation Rules ■ Manipulating Sets of Transformation Rules ■ Making Definitions ■ Special Forms of Assignment ■ Making Definitions for Indexed Objects ■ Making Definitions for Functions ■ The Ordering of Definitions ■ Immediate and Delayed Definitions ■ Functions That Remember Values They Have Found ■ Associating Definitions with Different Symbols ■ Defining Numerical Values ■ Modifying Built-in Functions ■ Advanced Topic: Manipulating Value Lists	
2.5	Evaluation of Expressions.....	310
	■ Principles of Evaluation ■ Reducing Expressions to Their Standard Form ~■ Attributes ■ The Standard Evaluation Procedure ~■ Non-Standard Evaluation ~■ Evaluation in Patterns, Rules and Definitions ■ Evaluation in Iteration Functions ■ Conditionals ~■ Loops and Control Structures ■ Tracing Evaluation ■ Advanced Topic: The Evaluation Stack ■ Advanced Topic: Controlling Infinite Evaluation ■ Advanced Topic: Interrupts and Aborts ~■ Compiling <i>Mathematica</i> Expressions ~■ Advanced Topic: Manipulating Compiled Code	
2.6	Modularity and the Naming of Things.....	363
	■ Modules and Local Variables ■ Local Constants ■ How Modules Work ■ Advanced Topic: Variables in Pure Functions and Rules ■ Dummy Variables in Mathematics ■ Blocks and Local Values ■ Blocks Compared with Modules ■ Contexts ■ Contexts and Packages ■ Setting Up <i>Mathematica</i> Packages ■ Automatic Loading of Packages ~■ Manipulating Symbols and Contexts by Name ■ Advanced Topic: Intercepting the Creation of New Symbols	
2.7	Strings and Characters.....	391
	■ Properties of Strings ~■ Operations on Strings ■ String Patterns ~■ Characters in Strings +■ Special Characters ~■ Advanced Topic: Newlines and Tabs in Strings ~■ Advanced Topic: Character Codes +■ Advanced Topic: Raw Character Encodings	
2.8	Textual Input and Output.....	409
	~■ Forms of Input and Output ~■ How Input and Output Work +■ The Representation of Textual Forms +■ The Interpretation of Textual Forms ■ Short and Shallow Output ■ String-Oriented Output Formats ■ Output Formats for Numbers ■ Tables and Matrices +■ Styles and Fonts in Output +■ Representing Textual Forms by Boxes +■ Adjusting Details of Formatting +■ String Representation of Boxes +■ Converting between Strings, Boxes and Expressions +■ The Syntax of the <i>Mathematica</i> Language +■ Operators without Built-in Meanings ~■ Defining Output Formats +■ Advanced Topic: Low-Level Input and Output Rules ■ Generating Unstructured Output +■ Generating Styled Output in Notebooks ■ Requesting Input ■ Messages ■ International Messages ■ Documentation Constructs	
2.9	The Structure of Graphics and Sound.....	472
	■ The Structure of Graphics ■ Two-Dimensional Graphics Elements ■ Graphics Directives and Options ~■ Coordinate Systems for Two-Dimensional Graphics ■ Labeling Two-Dimensional Graphics ■ Making Plots within Plots ~■ Density and Contour Plots ~■ Three-Dimensional Graphics Primitives ■ Three-Dimensional Graphics Directives ■ Coordinate Systems for Three-Dimensional Graphics ■ Plotting Three-Dimensional Surfaces ~■ Lighting and Surface Properties ■ Labeling Three-Dimensional Graphics ■ Advanced Topic: Low-Level Graphics Rendering ~■ Formats for Text in Graphics ~■ Graphics Primitives for Text ■ Advanced Topic: Color Output ■ The Representation of Sound +■ Exporting Graphics and Sounds +■ Importing Graphics and Sounds	

2.10 Manipulating Notebooks.....	558
+■ Cells as <i>Mathematica</i> Expressions +■ Notebooks as <i>Mathematica</i> Expressions +■ Manipulating Notebooks from the Kernel +■ Manipulating the Front End from the Kernel +■ Advanced Topic: Executing Notebook Commands Directly in the Front End +■ Button Boxes and Active Elements in Notebooks +■ Advanced Topic: The Structure of Cells +■ Styles and the Inheritance of Option Settings +■ Options for Cells ~■ Text and Font Options ~■ Advanced Topic: Options for Expression Input and Output +■ Options for Graphics Cells ~■ Options for Notebooks +■ Advanced Topic: Global Options for the Front End	
2.11 Files and Streams.....	613
■ Reading and Writing <i>Mathematica</i> Files ■ External Programs ■ Advanced Topic: Streams and Low-Level Input and Output ~■ Naming and Finding Files ~■ Files for Packages ■ Manipulating Files and Directories +■ Importing and Exporting Files ■ Reading Textual Data ■ Searching Files ■ Searching and Reading Strings	
2.12 MathLink and External Program Communication.....	647
+■ How <i>MathLink</i> Is Used +■ Installing Existing <i>MathLink</i> -Compatible Programs +■ Setting Up External Functions to Be Called from <i>Mathematica</i> +■ Handling Lists, Arrays and Other Expressions +■ Special Topic: Portability of <i>MathLink</i> Programs +■ Using <i>MathLink</i> to Communicate between <i>Mathematica</i> Sessions +■ Calling Subsidiary <i>Mathematica</i> Processes +■ Special Topic: Communication with <i>Mathematica</i> Front Ends +■ Two-Way Communication with External Programs +■ Special Topic: Running Programs on Remote Computers +■ Special Topic: Running External Programs under a Debugger +■ Manipulating Expressions in External Programs +■ Advanced Topic: Error and Interrupt Handling +■ Running <i>Mathematica</i> from Within an External Program	
2.13 Global Aspects of <i>Mathematica</i> Sessions.....	692
~■ The Main Loop ■ Dialogs ■ Date and Time Functions ■ Memory Management ~■ Advanced Topic: Global System Information ~■ Advanced Topic: Customizing Your <i>Mathematica</i> Configuration	

Part 3. Advanced Mathematics in *Mathematica*

3.1 Numbers.....	714
■ Types of Numbers +■ Numeric Quantities ~■ Converting between Different Forms of Numbers ~■ Numerical Precision ~■ Arbitrary-Precision Numbers ■ Machine-Precision Numbers +■ Advanced Topic: Interval Arithmetic ■ Advanced Topic: Indeterminate and Infinite Results +■ Advanced Topic: Controlling Numerical Evaluation	
3.2 Mathematical Functions.....	736
■ Naming Conventions ~■ Numerical Functions ~■ Pseudorandom Numbers ~■ Integer and Number-Theoretical Functions ~■ Combinatorial Functions ■ Elementary Transcendental Functions ■ Functions That Do Not Have Unique Values ~■ Mathematical Constants ■ Orthogonal Polynomials ~■ Special Functions ~■ Elliptic Integrals and Elliptic Functions +■ Mathieu and Related Functions +■ Working with Special Functions ■ Statistical Distributions and Related Functions	
3.3 Algebraic Manipulation.....	789
~■ Structural Operations on Polynomials ~■ Finding the Structure of a Polynomial ■ Structural Operations on Rational Expressions ~■ Algebraic Operations on Polynomials ~■ Polynomials Modulo Primes +■ Advanced Topic: Polynomials over Algebraic Number Fields +■ Trigonometric Expressions ■ Expressions Involving Complex Variables ~■ Simplification +■ Using Assumptions	
3.4 Manipulating Equations.....	811
■ The Representation of Equations and Solutions ~■ Equations in One Variable +■ Advanced Topic: Algebraic Numbers ■ Simultaneous Equations ■ Equations Involving Functions ■ Getting Full Solutions ■ Advanced Topic: Existence of	

Solutions ■ Eliminating Variables ~■ Solving Equations with Subsidiary Conditions ■ Advanced Topic: Solving Logical Combinations of Equations ■ Advanced Topic: Equations Modulo Integers

3.5	Calculus.....	830
	■ Differentiation ■ Total Derivatives ■ Derivatives of Unknown Functions ■ Advanced Topic: The Representation of Derivatives ■ Defining Derivatives ■ Indefinite Integrals ~■ Integrals That Can and Cannot Be Done ~■ Definite Integrals ■ Manipulating Integrals in Symbolic Form ~■ Differential Equations +■ Integral Transforms and Related Operations +■ Generalized Functions and Related Objects	
3.6	Series, Limits and Residues.....	860
	■ Making Power Series Expansions ■ Advanced Topic: The Representation of Power Series ■ Operations on Power Series ~■ Advanced Topic: Composition and Inversion of Power Series ~■ Converting Power Series to Normal Expressions ■ Solving Equations Involving Power Series +■ Summation of Series ■ Finding Limits ■ Residues	
3.7	Linear Algebra.....	871
	■ Constructing Matrices ~■ Getting Pieces of Matrices ■ Scalars, Vectors and Matrices ■ Operations on Scalars, Vectors and Matrices ~■ Multiplying Vectors and Matrices ■ Matrix Inversion ~■ Basic Matrix Operations ~■ Solving Linear Systems ■ Eigenvalues and Eigenvectors ~■ Advanced Topic: Matrix Decompositions ~■ Advanced Topic: Tensors	
3.8	Numerical Operations on Data.....	893
	■ Curve Fitting ~■ Approximate Functions and Interpolation ~■ Fourier Transforms +■ Convolutions and Correlations	
3.9	Numerical Operations on Functions.....	909
	■ Numerical Mathematics in <i>Mathematica</i> ■ The Uncertainties of Numerical Mathematics ~■ Numerical Integration ■ Numerical Evaluation of Sums and Products ■ Numerical Solution of Polynomial Equations ■ Numerical Root Finding ~■ Numerical Solution of Differential Equations ■ Numerical Minimization ■ Linear Programming +■ Advanced Topic: Functions with Sensitive Dependence on Their Input	
3.10	Mathematical and Other Notation.....	939
	+■ Special Characters +■ Names of Symbols and Mathematical Objects +■ Letters and Letter-like Forms +■ Operators ~■ Structural Elements and Keyboard Characters	

Formula Gallery.....	969
-----------------------------	------------

Graphics Gallery.....	979
------------------------------	------------

Appendix A. *Mathematica* Reference Guide

A.1	Basic Objects.....	1000
	■ Expressions ■ Symbols ■ Contexts ■ Atomic Objects ■ Numbers ~■ Character Strings	
A.2	Input Syntax.....	1005
	~■ Entering Characters +■ Types of Input Syntax ~■ Character Strings ~■ Symbol Names and Contexts ~■ Numbers ~■ Bracketed Objects ~■ Operator Input Forms +■ Two-Dimensional Input Forms +■ Input of Boxes ~■ The Extent of Input Expressions ~■ Special Input +■ Front End Files	

A.3	Some General Notations and Conventions.....	1027
	■ Function Names ■ Function Arguments ■ Options ■ Part Numbering ~■ Sequence Specifications ■ Level Specifications	
	■ Iterators ■ Scoping Constructs +■ Ordering of Expressions ~■ Mathematical Functions ~■ Mathematical Constants	
	■ Protection ■ String Patterns	
A.4	Evaluation.....	1034
	~■ The Standard Evaluation Sequence ■ Non-Standard Argument Evaluation ■ Overriding Non-Standard Argument Evaluation ~■ Preventing Evaluation ■ Global Control of Evaluation ■ Aborts	
A.5	Patterns and Transformation Rules.....	1038
	~■ Patterns ■ Assignments ■ Types of Values ■ Clearing and Removing Objects ■ Transformation Rules	
A.6	Files and Streams.....	1043
	-■ File Names ~■ Streams	
A.7	Mathematica Sessions.....	1045
	+■ Command-Line Options and Environment Variables ■ Initialization ■ The Main Loop ■ Messages ■ Termination	
	+■ Network License Management	
A.8	Installation and Organization of System Files.....	1050
	+■ Running and Installing <i>Mathematica</i> +■ Overall Organization of the CD-ROM +■ Running the Executable Programs +■ The Installation Process ~■ File Organization after Installation +■ Configuration Files +■ Documentation Files	
	+■ Add-ons	
A.9	Some Notes on Internal Implementation.....	1059
	+■ Introduction ~■ Data Structures and Memory Management +■ Basic System Features ~■ Numerical and Related Functions ~■ Algebra and Calculus ~■ Output and Interfacing	
A.10	Listing of Major Built-in Mathematica Objects.....	1065
	~■ Introduction ~■ Conventions in This Listing ~■ Listing	
A.11	Listing of C Functions in the MathLink Library.....	1317
	■ Introduction +■ Listing	
A.12	Listing of Named Characters.....	1328
	+■ Introduction +■ Listing	
A.13	Incompatible Changes since Mathematica Version 1.....	1378
	~■ Incompatible Changes between Version 1 and Version 2 ~■ Incompatible Changes between Version 2 and Version 3	
	~■ Incompatible Changes between Version 3 and Version 4	
	Index.....	1381
