Contents

Preface xi

1 Linear Equations 1

1.1 Introduction to Linear Systems *1*
1.2 Matrices and Gauss–Jordan Elimination *9*
1.3 On the Solutions of Linear Systems *24*

2 Linear Transformations 39

2.1 Introduction to Linear Transformations and Their Inverses *39*
2.2 Linear Transformations in Geometry *49*
2.3 The Inverse of a Linear Transformation *65*
2.4 Matrix Products *74*

3 Subspaces of $\mathbb{R}^n$ and Their Dimensions 96

3.1 Image and Kernel of a Linear Transformation *96*
3.2 Subspaces of $\mathbb{R}^n$; Bases and Linear Independence *110*
3.3 The Dimension of a Subspace of $\mathbb{R}^n$ *121*
3.4 Coordinates *134*

4 Linear Spaces 148

4.1 Introduction to Linear Spaces *148*
4.2 Linear Transformations and Isomorphisms *159*
4.3 Coordinates in a Linear Space *165*

5 Orthogonality and Least Squares 177

5.1 Orthonormal Bases and Orthogonal Projections *177*
5.2 Gram–Schmidt Process and *QR* Factorization *194*
5.3 Orthogonal Transformations and Orthogonal Matrices *201*
5.4 Least Squares and Data Fitting *211*
5.5 Inner Product Spaces *225*

6 Determinants 242

6.1 Introduction to Determinants *242*
6.2 Properties of the Determinant *251*
6.3 Geometrical Interpretations of the Determinant; Cramer's Rule *269*

7 Eigenvalues and Eigenvectors 288

7.1 Dynamical Systems and Eigenvectors: An Introductory Example *288*
7.2 Finding the Eigenvalues of a Matrix *302*
7.3 Finding the Eigenvectors of a Matrix *313*
7.4 Diagonalization *329*
7.5 Complex Eigenvalues *339*
7.6 Stability *355*

8 Symmetric Matrices and Quadratic Forms 365

8.1 Symmetric Matrices *365*
8.2 Quadratic Forms *374*
8.3 Singular Values *383*

9 Linear Differential Equations 396

9.1 An Introduction to Continuous Dynamical Systems *396*
9.2 The Complex Case: Euler's Formula *411*
9.3 Linear Differential Operators and Linear Differential Equations *425*

Appendix A Vectors 441
Answers to Odd-Numbered Exercises 450
Subject Index 472
Name Index 478
