

Contents

SECTION I Overview of Mechatronics

- 1 What is Mechatronics? *Robert H. Bishop and M. K. Ramasubramanian* 1-1
- 2 Mechatronic Design Approach *Rolf Isermann*..... 2-1
- 3 System Interfacing, Instrumentation, and Control Systems
Rick Homkes 3-1
- 4 Microprocessor-Based Controllers and Microelectronics
Ondrej Novak and Ivan Dolezal 4-1
- 5 An Introduction to Micro- and Nanotechnology *Michael Goldfarb, Alvin Strauss and Eric J. Barth* 5-1
- 6 Mechatronics: New Directions in Nano-, Micro-, and Mini-Scale Electromechanical Systems Design, and Engineering Curriculum Development *Sergey Edward Lyshchinski*..... 6-1

SECTION II Physical System Modeling

- 7 Modeling Electromechanical Systems *Francis C. Moon*..... 7-1
- 8 Structures and Materials *Eniko T. Enikov* 8-1
- 9 Modeling of Mechanical Systems for Mechatronics Applications
Raul G. Longoria..... 9-1

10	Fluid Power Systems	<i>Qin Zhang and Carroll E. Goering</i>	10-1
11	Electrical Engineering	<i>Giorgio Rizzoni</i>	11-1
12	Engineering Thermodynamics	<i>Michael J. Moran</i>	12-1
13	Modeling and Simulation for MEMS	<i>Carla Purdy</i>	13-1
14	Rotational and Translational Microelectromechanical Systems: MEMS Synthesis, Microfabrication, Analysis, and Optimization	<i>Sergey Edward Lyshevski</i>	14-1
15	The Physical Basis of Analogies in Physical System Models	<i>Neville Hogan and Peter C. Breedveld</i>	15-1

SECTION III Sensors and Actuators

16	Introduction to Sensors and Actuators	<i>M. Anjanappa, K. Datta and T. Song</i>	16-1
17	Fundamentals of Time and Frequency	<i>Michael A. Lombardi</i>	17-1
18	Sensor and Actuator Characteristics	<i>Joey Parker</i>	18-1
19	Sensors		19-1
19.1	Linear and Rotational Sensors	<i>Kevin Lynch and Michael Peshkin</i>	19-2
19.2	Acceleration Sensors	<i>Halit Eren</i>	19-12
19.3	Force Measurement	<i>M. A. Elbestawi</i>	19-34
19.4	Torque and Power Measurement	<i>Ivan Garshelis</i>	19-48
19.5	Flow Measurement	<i>Richard Thorn</i>	19-62
19.6	Temperature Measurements	<i>Pamela Norris and Bouvard Hosticka</i>	19-73
19.7	Distance Measuring and Proximity Sensors	<i>J. Fernando Figueroa</i>	19-88
19.8	Light Detection, Image, and Vision Systems	<i>Stanley Ipson</i>	19-119
19.9	Integrated Microsensors	<i>Chang Liu</i>	19-136
20	Actuators		20-1
20.1	Electromechanical Actuators	<i>George T.-C. Chiu</i>	20-1
20.2	Electrical Machines	<i>Charles Fraser</i>	20-33
20.3	Piezoelectric Actuators	<i>Habil Ramutis Bansevicius and Rymanta Tadas Tolocka</i>	20-51

- 20.4 Hydraulic and Pneumatic Actuation Systems *Massimo Sorli and Stefano Pastorelli*.... 20-62
 20.5 MEMS: Microtransducers Analysis, Design, and Fabrication *Sergey Lyshevski* 20-96

SECTION IV Systems and Controls

- 21 The Role of Controls in Mechatronics *Job van Amerongen*..... 21-1
- 22 The Role of Modeling in Mechatronics Design *Jeffrey A. Jalkio* 22-1
- 23 Signals and Systems..... 23-1
 23.1 Continuous- and Discrete-Time Signals *Momoh Jimoh Salami*..... 23-1
 23.2 z Transform and Digital Systems *Rolf Johansson*..... 23-29
 23.3 Continuous- and Discrete-Time State-Space Models
Kam Leang, Qingze Zou, and Santosh Devasia..... 23-40
 23.4 Transfer Functions and Laplace Transforms *C. Nelson Dorny*..... 23-54
- 24 State Space Analysis and System Properties *Mario E. Salgado
 and Juan I. Yuz* 24-1
- 25 Response of Dynamic Systems *Raymond de Callafon*..... 25-1
- 26 The Root Locus Method *Hitay Özbay*..... 26-1
- 27 Frequency Response Methods *Jyh-Jong Sheen*..... 27-1
- 28 Kalman Filters as Dynamic System State Observers
Timothy P. Crain II..... 28-1
- 29 Digital Signal Processing for Mechatronic Applications *Bonnie
 S. Heck and Thomas R. Kurfess* 29-1
- 30 Control System Design Via \mathcal{H}^2 Optimization
Armando A. Rodriguez 30-1
- 31 Adaptive and Nonlinear Control Design *Maruthi R. Akella* 31-1
- 32 Neural Networks and Fuzzy Systems *Bogdan M. Wilamowski*..... 32-1

33	Advanced Control of an Electrohydraulic Axis	<i>Florin Ionescu, Crina Vlad and Dragos Arotaritei</i>	33-1
34	Design Optimization of Mechatronic Systems	<i>Tomas Brezina, Ctirad Kratochvil, and Cestmir Ondrusek</i>	34-1

SECTION V Computers and Logic Systems

35	Introduction to Computers and Logic Systems	<i>Kevin Craig and Fred Stolfi</i>	35-1
36	Digital Logic Concepts and Combinational Logic Design	<i>George I. Cohn</i>	36-1
37	System Interfaces	<i>M.J. Tordon and J. Katupitiya</i>	37-1
38	Communications and Computer Networks	<i>Mohammad Ilyas</i>	38-1
39	Fault Analysis in Mechatronic Systems	<i>Leila Notash and Thomas N. Moore</i>	39-1
40	Logic System Design	<i>M. K. Ramasubramanian</i>	40-1
41	Synchronous and Asynchronous Sequential Systems	<i>Sami A. Al-Arian</i>	41-1
42	Architecture	<i>Daniel A. Connors and Wen-mei W. Hwu</i>	42-1
43	Control with Embedded Computers and Programmable Logic Controllers	<i>Hugh Jack and Andrew Sterian</i>	43-1

SECTION VI Software and Data Acquisition

44	Introduction to Data Acquisition	<i>Jace Curtis</i>	44-1
45	Measurement Techniques: Sensors and Transducers	<i>Cecil Harrison</i>	45-1

46	A/D and D/A Conversion	<i>Mike Tyler</i>	46-1
47	Signal Conditioning	<i>Stephen A. Dyer</i>	47-1
48	Computer-Based Instrumentation Systems	<i>Kris Fuller</i>	48-1
49	Software Design and Development	<i>Margaret H. Hamilton</i>	49-1
50	Data Recording and Logging	<i>Tom Magruder</i>	50-1
	Index		I-1
