

CONTENTS

CHAPTER	PAGE
I. Cam Applications and Special Cam Designs.....	1
II. Intermittent Motions from Gears and Cams.....	61
III. Intermittent Motions from Ratchet Gearing.....	114
IV. Intermittent Motions of the Geneva Type.....	164
V. Tripping or Stop Mechanisms.....	189
VI. Overload Relief Mechanisms and Automatic Safe- guards	221
VII. Reversing Mechanisms of Special Design.....	242
VIII. Drives of the Crank Type for Reciprocating Driven Members	260
IX. Reciprocating Motions Derived from Cams, Gears, Levers and Special Mechanisms.....	284
X. Speed-Changing Mechanisms	321
XI. Special Transmissions and Over-running Clutches.....	346
XII. Self-Centering Pivoted Levers and Sliding Members....	369
XIII. Multiple-Lever Mechanisms with Dwelling or Idle Periods and Other Special Lever Combinations.....	385
XIV. Feeding Mechanisms and Auxiliary Devices.....	412
XV. Feeding and Ejecting Mechanisms for Power Presses..	455
XVI. Miscellaneous Mechanisms or Mechanical Movements....	480
XVII. Engine Valve Diagrams and Their Applications in Studying Valve Action.....	513
