Contents

Chapter 1. Classical Mechanics **1**

1.1 Newtonian Mechanics, 1
1.2 Hamiltonian Mechanics, 3
1.3 The Harmonic Oscillator, 5

Chapter 2. Fundamentals of Quantum Mechanics **14**

2.1 The de Broglie Relationship, 14
2.2 Accounting for Wave Character in Mechanical Systems, 16
2.3 The Born Interpretation, 18
2.4 Particle-in-a-Box, 20
2.5 Hermitian Operators, 27
2.6 Operators and Expectation Values, 27
2.7 The Heisenberg Uncertainty Principle, 29
2.8 Particle in a Three-Dimensional Box and Degeneracy, 33

Chapter 3. Rotational Motion **37**

3.1 Particle-on-a-Ring, 37

3.2 Particle-on-a-Sphere, 42

Chapter 4. Techniques of Approximation **54**

4.1 Variation Theory, 54

4.2 Time-Independent Non-Degenerate Perturbation Theory, 60

4.3 Time-Independent Degenerate Perturbation Theory, 76

Chapter 5. Particles Encountering a Finite Potential Energy **85**

5.1 Harmonic Oscillator, 85

5.2 Tunneling, Transmission, and Reflection, 96

Chapter 6. Vibrational/Rotational Spectroscopy of Diatomic Molecules **113**

6.1 Fundamentals of Spectroscopy, 113

6.2 Rigid Rotor Harmonic Oscillator Approximation (RRHO), 115

6.3 Vibrational Anharmonicity, 128

6.4 Centrifugal Distortion, 132

6.5 Vibration-Rotation Coupling, 135

6.6 Spectroscopic Constants from Vibrational Spectra, 136

6.7 Time Dependence and Selection Rules, 140

Chapter 7. Vibrational and Rotational Spectroscopy of Polyatomic Molecules **150**

7.1 Rotational Spectroscopy of Linear Polyatomic Molecules, 150

7.2 Rotational Spectroscopy of Non-Linear Polyatomic Molecules, 156

7.3 Infrared Spectroscopy of Polyatomic Molecules, 168

Chapter 8. Atomic Structure and Spectra **177**

8.1 One-Electron Systems, 177
8.2 The Helium Atom, 191
8.3 Electron Spin, 199
8.4 Complex Atoms, 200
8.5 Spin-Orbit Interaction, 207
8.6 Selection Rules and Atomic Spectra, 217

Chapter 9. Methods of Molecular Electronic Structure Computations **222**

9.1 The Born-Oppenheimer Approximation, 222
9.2 The H_2^+ Molecule, 224
9.3 Molecular Mechanics Methods, 232
9.4 *Ab Initio* Methods, 235
9.5 Semi-Empirical Methods, 249
9.6 Density Functional Methods, 251
9.7 Computational Strategies, 255

Appendix I. Table of Physical Constants **259**

Appendix II. Table of Energy Conversion Factors **260**

Appendix III. Table of Common Operators **261**

Index **262**
