

# CONTENTS

|  |    |
|--|----|
| SUMMARY .....  | 1  |
| 1. INTRODUCTION .....  | 3  |
| 1.1. Background .....  | 3  |
| 1.2. Objective .....   | 4  |
| 1.3. Scope .....   | 5  |
| 1.4. Structure .....   | 5  |
| 2. TYPES AND QUANTITIES OF WASTE GENERATED<br>DURING FACILITY OPERATION<br>AND DECOMMISSIONING ..... | 6  |
| 2.1. Introduction .....  | 6  |
| 2.2. Generation of low and intermediate level radioactive waste in<br>nuclear facilities .....       | 10 |
| 2.2.1. Waste generation from nuclear fuel facilities .....   | 10 |
| 2.2.2. Waste generation from operation of<br>nuclear power plants .....                              | 14 |
| 2.2.3. Waste from spent fuel reprocessing .....  | 19 |
| 2.2.4. Waste from decontamination and decommissioning<br>of nuclear facilities .....                 | 21 |
| 2.2.5. Waste from institutional and industrial facilities,<br>including research laboratories .....  | 26 |
| 2.3. Mixed waste streams .....   | 28 |
| 3. METHODOLOGIES FOR WASTE MINIMIZATION .....  | 29 |
| 3.1. Objectives of waste minimization .....  | 29 |
| 3.2. Waste minimization options .....  | 29 |
| 3.2.1. Control of radioactive waste generation .....   | 30 |
| 3.2.2. Prevention of activation/contamination .....  | 31 |
| 3.2.3. Reuse and recycling of materials .....  | 32 |
| 3.2.4. Reduction of radioactive waste volumes .....  | 32 |
| 4. DESIGN OPTION CONSIDERATIONS<br>FOR WASTE MINIMIZATION .....                                      | 35 |
| 4.1. Introduction .....  | 35 |

|   |     |
|---|-----|
| 4.2. Considerations for   |     |
| minimizing contamination problems .....   | 37  |
| 4.2.1. Building and equipment layout .....  | 38  |
| 4.2.2. Selection of components .....  | 44  |
| 4.2.3. Reducing surface contamination .....   | 49  |
| 4.2.4. Reducing leakage and crud traps .....  | 53  |
| 4.2.5. Quality control .....  | 53  |
| 4.2.6. Limiting corrosion .....   | 54  |
| 4.2.7. Minimizing the spread of contamination .....   | 54  |
| 4.3. Provisions to facilitate decontamination .....   | 55  |
| 4.4. Provisions to facilitate dismantling and segmentation .....                                | 57  |
| 4.4.1. Minimum use of hazardous materials .....   | 57  |
| 4.4.2. Additional plant layout requirements to facilitate<br>dismantling .....                  | 57  |
| 4.4.3. Preplacement of dismantling aids .....   | 58  |
| 4.4.4. Shielding .....  | 59  |
| 4.4.5. Connectors .....   | 61  |
| 4.4.6. Intact removal of large components .....   | 61  |
| 4.4.7. Documentation .....  | 63  |
| 4.4.8. Planning .....   | 66  |
| 4.5. Development and improvement of techniques<br>for decontamination and decommissioning ..... | 67  |
| 4.5.1. Development and improvement of decontamination<br>techniques .....                       | 67  |
| 4.5.2. Development and improvement<br>of dismantling techniques .....                           | 69  |
| 4.5.3. Development and improvement<br>of measurement techniques .....                           | 71  |
| 4.5.4. Developments to simplify waste management .....  | 73  |
| 4.5.5. Design for safe enclosure and deferred dismantling ...                                   | 79  |
| 4.6. Development and improvement of the regulatory approach ..                                  | 82  |
| 4.7. Nuclear facility design basis guidelines for waste minimization                            | 83  |
| <br>  |     |
| 5. CONCLUSIONS .....  | 90  |
| <br>  |     |
