

CONTENTS

Editor's Foreword	vii
Preface	ix
Translator's Preface	xi
Part I Elementary Excitations	1
1 The Energy Spectrum of a Quantum Liquid and Superfluidity	3
2 The Thermodynamic Functions of Helium II	10
3 The Quantization of the Motion of the Liquid	16
4 The Relation between the Energy Spectrum of Excitations and the Structure Factor of Liquid Helium II	20
5 The Energy Spectrum of a Weakly Nonideal Bose Gas	27
6 On the Form of the Elementary Excitation Spectrum in the Vicinity of Singular Points	32
7 Interactions between Elementary Excitations	40
Part II Hydrodynamics	53
8 The Hydrodynamics of Superfluids	55
9 The Dissipative Terms in the Hydrodynamic Equations	63
10 The Propagation of Sound in a Superfluid	67
11 The Excitation of Sound Waves in a Superfluid	72
12 The Absorption of Sound	78

13	Discontinuities in a Superfluid	81
14	Fourth Sound	88
15	Capillary Waves	90
16	The Hydrodynamics of a Rotating Superfluid	93
17	Superfluid Hydrodynamics near the λ -Point	105
Part III	Kinetic Phenomena	111
18	The Kinetic Equation for Elementary Excitations	113
19	Thermal Conductivity	120
20	The First Viscosity	126
21	The Coefficients of Second Viscosity of Helium II	129
22	Sound in Helium II near Zero Temperature	135
23	Heat Exchange between a Solid and Helium II	138
Part IV	Impurities in Helium II	147
24	Solutions of Impurities in Helium II	149
25	The Diffusion Coefficient and Thermal Conductivity in Weak Solutions of He ³ in Helium II	165
	References	171
	Supplementary References	174
