<i>Preface</i>	<i>page xiii</i>
1 Strategies for solving problems	1
1.1 General strategies	1
1.2 Units, dimensional analysis	4
1.3 Approximations, limiting cases	7
1.4 Solving differential equations numerically	11
1.5 Problems	14
1.6 Exercises	15
1.7 Solutions	18
2 Statics	22
2.1 Balancing forces	22
2.2 Balancing torques	27
2.3 Problems	30
2.4 Exercises	35
2.5 Solutions	39
3 Using $F = ma$	51
3.1 Newton's laws	51
3.2 Free-body diagrams	55
3.3 Solving differential equations	60
3.4 Projectile motion	65
3.5 Motion in a plane, polar coordinates	68
3.6 Problems	70
3.7 Exercises	75
3.8 Solutions	84
4 Oscillations	101
4.1 Linear differential equations	101
4.2 Simple harmonic motion	105

4.3	Damped harmonic motion	107
4.4	Driven (and damped) harmonic motion	109
4.5	Coupled oscillators	115
4.6	Problems	120
4.7	Exercises	122
4.8	Solutions	127
5	Conservation of energy and momentum	138
5.1	Conservation of energy in one dimension	138
5.2	Small oscillations	147
5.3	Conservation of energy in three dimensions	148
5.4	Gravity	152
5.5	Momentum	156
5.6	The center of mass frame	161
5.7	Collisions	164
5.8	Inherently inelastic processes	167
5.9	Problems	173
5.10	Exercises	180
5.11	Solutions	194
6	The Lagrangian method	218
6.1	The Euler–Lagrange equations	218
6.2	The principle of stationary action	221
6.3	Forces of constraint	227
6.4	Change of coordinates	229
6.5	Conservation laws	232
6.6	Noether’s theorem	236
6.7	Small oscillations	239
6.8	Other applications	242
6.9	Problems	246
6.10	Exercises	251
6.11	Solutions	255
7	Central forces	281
7.1	Conservation of angular momentum	281
7.2	The effective potential	283
7.3	Solving the equations of motion	285
7.4	Gravity, Kepler’s laws	287
7.5	Problems	296
7.6	Exercises	298
7.7	Solutions	300

8	Angular momentum, Part I (Constant \hat{L})	309
8.1	Pancake object in x - y plane	310
8.2	Nonplanar objects	316
8.3	Calculating moments of inertia	318
8.4	Torque	322
8.5	Collisions	328
8.6	Angular impulse	331
8.7	Problems	333
8.8	Exercises	339
8.9	Solutions	349
9	Angular momentum, Part II (General \hat{L})	371
9.1	Preliminaries concerning rotations	371
9.2	The inertia tensor	376
9.3	Principal axes	383
9.4	Two basic types of problems	388
9.5	Euler’s equations	393
9.6	Free symmetric top	396
9.7	Heavy symmetric top	399
9.8	Problems	415
9.9	Exercises	421
9.10	Solutions	428
10	Accelerating frames of reference	457
10.1	Relating the coordinates	458
10.2	The fictitious forces	460
10.3	Tides	471
10.4	Problems	477
10.5	Exercises	482
10.6	Solutions	486
11	Relativity (Kinematics)	501
11.1	Motivation	502
11.2	The postulates	509
11.3	The fundamental effects	511
11.4	The Lorentz transformations	523
11.5	Velocity addition	529
11.6	The invariant interval	533
11.7	Minkowski diagrams	536
11.8	The Doppler effect	539
11.9	Rapidity	543
11.10	Relativity without c	546

11.11 Problems	549
11.12 Exercises	556
11.13 Solutions	565
12 Relativity (Dynamics)	584
12.1 Energy and momentum	584
12.2 Transformations of E and p	594
12.3 Collisions and decays	596
12.4 Particle-physics units	600
12.5 Force	601
12.6 Rocket motion	606
12.7 Relativistic strings	609
12.8 Problems	611
12.9 Exercises	615
12.10 Solutions	619
13 4-vectors	634
13.1 Definition of 4-vectors	634
13.2 Examples of 4-vectors	635
13.3 Properties of 4-vectors	637
13.4 Energy, momentum	639
13.5 Force and acceleration	640
13.6 The form of physical laws	643
13.7 Problems	645
13.8 Exercises	645
13.9 Solutions	646
14 General Relativity	649
14.1 The Equivalence Principle	649
14.2 Time dilation	650
14.3 Uniformly accelerating frame	653
14.4 Maximal-proper-time principle	656
14.5 Twin paradox revisited	658
14.6 Problems	660
14.7 Exercises	663
14.8 Solutions	666
<i>Appendix A Useful formulas</i>	675
<i>Appendix B Multivariable, vector calculus</i>	679
<i>Appendix C $F = ma$ vs. $F = dp/dt$</i>	690
<i>Appendix D Existence of principal axes</i>	693
<i>Appendix E Diagonalizing matrices</i>	696
<i>Appendix F Qualitative relativity questions</i>	698

<i>Appendix G Derivations of the Lv/c^2 result</i>	704
<i>Appendix H Resolutions to the twin paradox</i>	706
<i>Appendix I Lorentz transformations</i>	708
<i>Appendix J Physical constants and data</i>	711
<i>References</i>	713
<i>Index</i>	716
