

Contents

1	Introduction	1
1.1	The Invention of Digital Coherent Optical Systems	1
1.2	How Did We Get Here?	4
1.3	Digital Coherent Optical Systems in Modern Optical Networks	8
1.3.1	From Routers to Wavelengths	8
1.3.2	Wavelength Multiplexing and the Flexible Grid	10
1.3.3	Wavelength Routing	11
1.4	Problems	15
	References	16
2	The Optical Transmitter	19
2.1	Principles of Digital Modulation	19
2.2	Lasers	27
2.3	Optical Modulation	30
2.3.1	Phase Modulator	32
2.3.2	Mach–Zehnder Modulator	33
2.3.3	In-Phase and Quadrature Modulator	35
2.3.4	Dual-Polarization Modulator	37
2.4	Problems	38
2.5	Matlab/Octave Functions	39
2.5.1	Functions for Sect. 2.1	39
2.5.2	Functions for Sect. 2.2	44
2.5.3	Functions for Sect. 2.3	45
	References	46
3	The Optical Channel	47
3.1	Propagation Modes and Single-Mode Condition	48
3.2	Chromatic Dispersion	54
3.3	Polarization Effects	58
3.4	Attenuation	61
3.5	Optical Amplification	63

3.6	Nonlinear Interference	70
3.6.1	Effective Length and Effective Area	70
3.6.2	Inelastic Scattering.....	72
3.6.3	Kerr Effect	73
3.6.4	The Gaussian Noise Model.....	77
3.7	Problems	82
3.8	Matlab/Octave Functions	85
3.8.1	Functions for Section 3.2	85
3.8.2	Functions for Section 3.3	86
3.8.3	Functions for Section 3.5	88
	References	89
4	The Receiver Front-End, Orthogonalization, and Deskew	91
4.1	The Receiver Front-end	93
4.2	Deskew	97
4.3	Orthogonalization	99
4.4	Problems	100
4.5	Matlab/Octave Functions	103
4.5.1	Functions for Sect. 4.1	103
4.5.2	Functions for Sect. 4.2	106
	References	109
5	Equalization	111
5.1	Static Equalization	112
5.2	Adaptive Equalization	116
5.2.1	Fundamentals of Adaptive Equalization	116
5.2.2	Adaptive Equalization in Polarization-Multiplexed Systems.....	120
5.2.2.1	Constant Modulus Algorithm (CMA)	122
5.2.2.2	Radius-Directed Equalization (RDE).....	125
5.2.2.3	Decision-Directed Algorithm	126
5.3	Problems	128
5.4	Matlab/Octave Functions	130
5.4.1	Functions for Sect. 5.1	130
5.4.2	Functions for Sect. 5.2	132
5.4.3	Auxiliary Functions.....	135
	References	136
6	Carrier Recovery	139
6.1	Frequency Recovery	140
6.2	Phase Recovery	141
6.2.1	The Phase Unwrapper	144
6.2.2	The Viterbi & Viterbi Algorithm.....	144
6.2.3	Decision-Directed Algorithm	146
6.2.4	The Blind Phase Search Algorithm	149
6.3	Cycle Slips and Differential Encoding	152

6.4	Problems	153
6.5	Matlab/Octave Functions	156
6.5.1	Functions for Sect. 6.1	156
6.5.2	Functions for Sect. 6.2	158
6.5.3	Functions for Sect. 6.3	164
6.5.4	Auxiliary Functions	168
	References	172
7	Clock Recovery	175
7.1	Clock Recovery Architectures	176
7.2	Interpolator	179
7.3	Timing Error Detector	180
7.4	Loop Filter	184
7.5	Numerically Controlled Oscillator	185
7.6	Problems	187
7.7	Matlab/Octave Functions	189
7.7.1	Functions for Sect. 7.1	189
	References	191
8	Performance Evaluation	193
8.1	Introduction	193
8.2	Performance Evaluation with BER_{pre} and the FEC Limit	194
8.3	Performance Evaluation with Information-Theoretic Approaches ...	195
8.3.1	Coded Modulation and AIRs	196
8.3.2	Mutual Information	200
8.3.3	Generalized Mutual Information	206
8.3.4	Normalized Generalized Mutual Information	212
8.4	Problems	213
8.5	Matlab/Octave Functions	215
8.5.1	Functions for Sect. 8.3	215
	References	222
	Index	225
